SKILLS

- Microsoft 365
- Python
- Teamwork
- Time Management
- C programming language
- Google Colab
- Git and Github
- HTML
- CSS
- JAVA programming language

LANGUAGES

- English (Fluent)
- Turkish (Fluent)

PROFILE

I am a Computer Engineering student and Research Assistant at Complex Lab Systems with a strong interest in software engineering, data science, and artificial intelligence. I am currently learning machine learning and AI while building practical skills in programming, data analysis, system testing, and technical documentation through research and hands-on projects. I have strong mathematical and analytical problem-solving abilities, allowing me to approach complex challenges with structured and efficient solutions. I am committed to continuous learning and improving my technical depth through real-world application. I independently built and deployed my personal portfolio website using HTML and GitHub. I am seeking opportunities to contribute to impactful projects in software, data, and AI-driven systems.

WORK EXPERIENCE

TOOMTI

INTERN

November 2025 - February 2026

- Contributing to both web development and sales operation.
- Aided in client communication, and translating technical solutions into business value.
